

JOB OFFER

TECHNICIAN, AIRBORNE SURVEYS (SYSTEMS OPERATOR)

Under the supervision of the Director of Aerial Operations, PHB is looking for Technicians to perform aerial photography or airborne LiDAR missions. As part of his duties, the Technician is required to travel where the company's projects lead for periods of several consecutive weeks.

Comprehensive training is offered from the Quebec office.

DUTIES / RESPONSABILITIES:

- Carry out aerial photography or airborne LiDAR missions in accordance with the technical specifications of the project;
- Operate all types of airborne systems, including positioning systems (GPS stations, IMU, etc.);
- Know and understand the contents of the Company's operations & technical manuals
- Participate in the maintenance, installation, testing, adjustments and repairs of tools and equipment when necessary;
- Update server missions, data transfer & shipment on a daily basis;
- Complete the flight reports and record them daily on the server;
- Understand and follow quality procedures.

REQUIREMENTS:

- Geomatics, photography or related training;
- Computer literacy;
- Have a valid driver's license and a valid passport;
- Bilingualism (English & French, spoken and written);
- Availability to be positioned away from home for periods of up to several consecutive weeks at a time.

GENERAL CONDITIONS:

- Our offices are located at THE Quebec City Airport and our projects are executed in Canada and internationally;
- Competitive salary and benefits.
